QL6100

First Class Pure Stainless Steel Fingerprint Door Lock!
Give you a Safer, Stronger Protection!

Fingerprint	Password	RFID	IR Detect
Dual Security	Mini USB	Lock Alarm	Low Battery

Stainless Steel 304 for Raw Material

Stainless steel 304 provides stronger strength for breaking and better resistance to corrosion.

Nixie Tube Display

The Nixie Tube can display the state of lock and User ID number, helps you to understand the lock and manage the users.

IR Auto Wake-up System

The two IR detecting tubes allow easier activation of the lock when you place a finger on the sensor. Just one touch the sensor to unlock.

Cylinder for Emergency Case Access

When the lock has problems like batteries run off, PCB failure, or mechanical problem, the cylinder provides a solution for emergency access.

US Standard Mortise

Mortise is US standard with auto-lock function. When the mortise doesn't close to the right place, a "fail to lock" alarm will active to remind you.
